PJ 62 New Feature

## PJ 62 Trimmer - New Feature Extended Housing for Increased Robustness

Sonion is pleased to announce that a new feature, which improves the robustness of the component, is now available for the PJ 62 Trimmers. The new feature - extended housing no. 12 and thicker resistance element - is illustrated above.

The change is part of Sonion's continuous improvement philosophy and has been tested and qualified. The new extended housing and resistance element is available as of September 2003.

Ordering the new feature will automatically generate a new Sonion part number. However, for further information or samples request, we kindly ask you to contact your normal sales contact person.

Compared to the previous version, the improved PJ 62 Trimmer has the following features:

- Improved mechanical and electrical reliability
- Significantly improved robustness

Please note that the PJ 62 version with extended housing no. 12 also has 20 mm leads instead of the previous 15 mm leads.
