New Type of Color Coding

PJ 77 and PJ 78 Volume Controls Improved Color Coding Durability

onion is pleased to announce that we have improved the type of color coding for the Volume Controls PJ 77 and PJ 78.

The new type of color coding was introduced in August 1997.

Compared to the previous type of color coding, the new type has the following features:

- Better resistance to various types of cleaning solvents
- Improved adhesion better protection from mechanical stress
- Same wide color range available
